

**ADDENDUM FOR USE OF STATION ALERTING SYSTEM  
TO CONTROL SHUTOFF VALVES FOR NATURAL GAS AND PROPANE IN STATIONS**

This Addendum for Use of Station Alerting System to Control Shutoff Valves for Natural Gas and Propane in Stations (“Addendum”) is entered into between US Digital Designs, Inc. (“USDD”) and Customer.

USDD has entered into a Proposal and Acceptance (“Agreement”) with Customer to provide a custom station call pack system (“System”) and has issued a warranty for the System (“Warranty”) to Customer.

The Agreement and Warranty specify that it is not a permitted use of the System to control shutoff valves for natural gas and propane in the stations unless this Addendum has been signed. USDD has informed Customer that there are safety risks in using the System for controlling gas shutoff valves and has recommended that Customer not use the System for this purpose.

**CUSTOMER AND USDD AGREE AS FOLLOWS:**

1. In exchange for the promises of Customer contained in this Addendum, USDD agrees to provide technical assistance to the vendor that Customer hires to install the system to control shutoff valves for natural gas and propane in the station. Such technical assistance will be limited to explaining the characteristics of the signal that is output from the System when an alarm event occurs so that the signal may be used as an input to the system that the vendor installs.
2. Customer agrees to defend, indemnify and hold USDD and its officers and employees harmless from any loss, claim, damage, cost or expense that is suffered or incurred (including attorney’s fees) by USDD or its officers or employees that arises from Customer using the System to control shutoff valves for natural gas and propane in the stations.
3. Customer agrees to release USDD from any loss or damage that Customer may suffer including damage to a station or the equipment therein that arises from Customer using the System to control shutoff valves for natural gas and propane in the stations.
