

4 Gang Electrical box for surface mounting of the USDD Room Remote 2

The components that have been tested to work are from Home Depot:

Steel City 4 Gang Box 4G ½ ¾ 785991130201

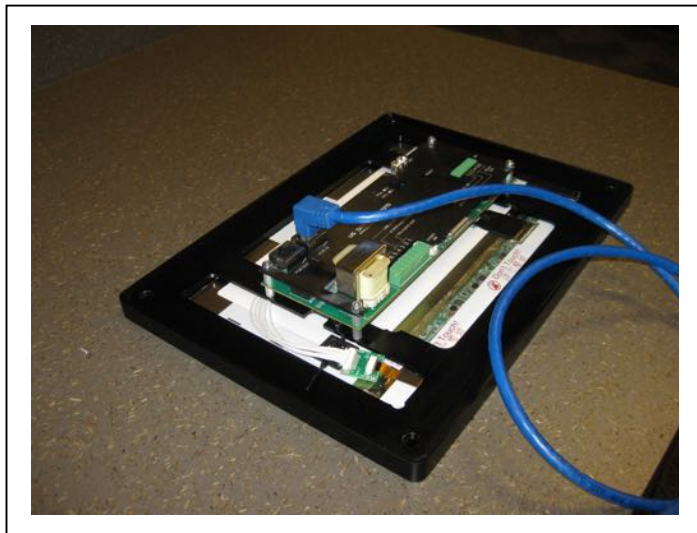

Steel City Raised Cover 4GC 785991130355

The raised cover can be mounted pointing up as shown below or can be mounted pointing down as shown on page 2. This is a cleaner looking install but leaves much less room in the box for wiring.

The conduit should be a right angle type attached to the side to prevent water from entering the enclosure.

A right angle CAT 5 connector is necessary for proper clearance and to prevent stress on the CAT5 cable
